Amogo Solomon
Software Developer

Career Summary

Accomplished software Developer with over 3 years' experience specializing in JavaScript, React.js, tailwind and adept in crafting engaging web based application designs, fostering collaborative team environments, and solving complex challenges for cutting-edge solutions.

Experience

Frontend Software Engineer – Nkomor HealthCare Inc
January 2024 – Present

- As a Software Engineer at Nkomor, I've played a pivotal role in expanding our platform's capabilities through meticulous development and integration efforts. Key accomplishments include:

- Orchestrating the building and seamless integration of health insurance services into our platform architecture, employing React components and routing for efficient data management and user interaction.

- Spearheading the building and integration of lab services, utilizing RESTful APIs and asynchronous Node.js architecture to ensure robust data transfer and processing, enhancing the platform's diagnostic capabilities.

- Leading the transformation of our company's landing page by implementing modern design patterns and leveraging Tailwind CSS utility-first framework, resulting in a streamlined and visually compelling user interface.

- Implementing responsive design principles using media queries and Flexbox to adapt our platform to diverse screen sizes, ensuring optimal user experiences across devices.

Frontend Sotfware Engineer - Aceplora Tech
April 2023 – December 2023

- Leveraged industry-leading practices to engineer cutting-edge web technologies, specializing in Reacts, Javascript, TailwindCSS. Successfully delivered five high-impact SaaS Microservice projects within a single year.

- Spearheaded the successful development of a Legal firm platform tailored for legal firm operations. Leveraged expertise in frontend technologies, including React.js, Next.js and Hygraph to design and implement user-friendly interfaces and crucial functionalities.

- Proficiently leverage React.js in diverse projects, including a user-friendly Todo list app, a cutting edge crypto Defi frontend website, and an engaging Quiz application
